

Scatter plot showing the distribution of normalized firing rates for Pvalb, Sst, and Vip neurons. The y-axis represents the normalized firing rate, and the x-axis shows the three neuron types. Pvalb neurons (blue) show a wide distribution with a mean line. Sst neurons (orange) show a more clustered distribution with a mean line. Vip neurons (green) show a very tight cluster with a mean line.

A scatter plot showing the fraction of units for three cell types: Pvalb (blue), Sst (orange), and Vip (green). The y-axis is labeled 'fraction of units' and ranges from 0.1 to 0.5. Each cell type has a horizontal black line indicating the mean. Pvalb has a mean around 0.27, Sst around 0.24, and Vip around 0.15.

Cell Type	Fraction of Units (approximate values)	Mean (approximate)
Pvalb	0.15, 0.16, 0.25, 0.26, 0.28, 0.31, 0.36, 0.37	0.27
Sst	0.10, 0.11, 0.13, 0.14, 0.15, 0.26, 0.28, 0.34, 0.37, 0.42, 0.48	0.24
Vip	0.10, 0.11, 0.13, 0.15, 0.15, 0.17, 0.18, 0.21	0.15

fraction of units

Pvalb Sst Vip

Neuron Type	Fraction of Units (approximate values)
Pvalb	0.19, 0.20, 0.31, 0.36, 0.41, 0.42, 0.46
Sst	0.06, 0.13, 0.19, 0.20, 0.20, 0.32, 0.37, 0.42, 0.46, 0.62
Vip	0.12, 0.13, 0.14, 0.20, 0.20, 0.21, 0.25
